

INTEGRAL ELECTRIC SIDESHIFTER
AVAILABLE FOR ORDER!

Electrify Your Productivity with Cascade's New Electric Sideshifter

Actuators with Integrated Sensors

Electronic control and feedback data regarding position, load, speed and diagnostics sent to AGV using CAN Bus J1939 or CANopen protocol, reducing the need to add sensors to attachment.

Cascade's advanced Electric Sideshifter is an energy efficient solution designed with the latest technology to increase your productivity.

90% more energy efficient, which reduces energy usage and allows for longer battery life in your AGV or electric lift truck.

Improved visibility as no hydraulic hoses are required over the mast, reducing handling time and improving maneuverability.

Easy installation due to a simple electric hookup.

Environmentally Friendly
Electric actuators eliminate the need for hydraulics and the potential for leaking attachments. Perfect for use in clean applications, like food and pharma environments.

Lower total cost of ownership
Energy efficiency and all electric actuation, which eliminates the need for hydraulic components, reduces total system cost.
